

Turbo Waterless Wash

“Waterless Wash” is a blend of detergents, advanced waxes, and multiple macro polymers.

“Waterless Wash” first breaks down and then suspends dirt and grime. Each quart treats 7-10 cars depending on size and individual usage.

“Waterless Wash” can wash your car waterless right where it sits! No more messy hosepipes and buckets needed to wash your car. “Waterless Wash” washes and waxes your car with one product with absolutely no water.

“Waterless Wash” uses an advanced blend of detergents, advanced waxes and multiple macro polymers first breaks down and then suspends dirt and grime. Then replaces it with a protective layer of macro polymers and waxes, leaving your car clean and with a longer lasting shine you can be proud of.

“Waterless Wash” contains anti-statics that when used in conjunction with a microfiber towel, will keep dust off your vehicle surface longer and make it easier to remove. “Waterless Wash” is an eco-friendly way to wash your car.

PRODUCT FEATURES

- Each 32oz bottle will treat from 6 to 9 full size cars depending on their condition
- No hazardous materials to touch or breathe
- Cuts traditional washing time by 70-80%
- Biodegradable (3rd party bio tested. Report is available)
- Easy wipe on - wipe off technology
- Use it anywhere, anytime
- Stops the 100's of gallons in water wasted to wash the traditional way
- Use on paint, glass and chrome areas

Recommendation For Use:

Needed: 2 microfiber towels each folded two times.

1. Take a clean microfiber towel and spray it a few times to pre-wet the surface. Pre-wetting is done only the first time you use a microfiber towel.
2. Spray few times onto the area of the surface to be cleaned. (Area can be the size of a door).
3. Using the pre-wet towel, wipe area in a circular or back and forth motion until clean
4. Immediately use the 2nd clean dry microfiber towel and wipe area dry.
5. Repeat steps 1-3 until entire car is done.

No Petroleum Solvents - No Listed Hazardous Materials - No VOCs'
